## 01 KNX devices

Reference	Description	Technical data	Control type	Installation	Price €	Pack. Unit.	
<b>Twisted pair system - Laūka Push-buttons</b>							
	● <b>PU KNT 001</b>	Capacitive Push-button Black or White glass 4 buttons and RGB frame	Luminous and Customizable icons through Laūka Configurator	KNX bus	Universal Box	<b>206,62</b> <b>206,62</b>	1
	○ <b>PU KNT 006</b>						1
	● <b>PU KNT 002</b>	Capacitive Push-button Black or White glass 4 buttons and Copper frame	Luminous and Customizable icons through Laūka Configurator	KNX bus	Universal Box	<b>162,39</b> <b>162,39</b>	1
	○ <b>PU KNT 007</b>						1
	● <b>PU KNT 003</b>	Capacitive Push-button Black or White glass 4 buttons and Chrome frame	Luminous and Customizable icons through Laūka Configurator	KNX bus	Universal Box	<b>174,12</b> <b>174,12</b>	1
	○ <b>PU KNT 008</b>						1
<b>Twisted pair system - Laūka Dot push buttons</b>							
	● <b>PU KNT 102</b>	Capacitive Push-button Black glass with Copper frame and White glass with Chrome frame. 2 buttons	Tactile and Illuminated buttons	KNX bus	Universal Box	<b>123,34</b> <b>123,34</b>	1
	○ <b>PU KNT 112</b>						1
	● <b>PU KNT 104</b>	Capacitive Push-button Black glass with Copper frame and White glass with Chrome frame. 4 buttons	Tactile and Illuminated buttons	KNX bus	Universal Box	<b>135,06</b> <b>135,06</b>	1
	○ <b>PU KNT 114</b>						1
	● <b>PU KNT 106</b>	Capacitive Push-button Black glass with Copper frame and White glass with Chrome frame. 6 buttons	Tactile and Illuminated buttons	Bus KNX	Universal Box	<b>158,76</b> <b>158,76</b>	1
	○ <b>PU KNT 116</b>						1
	● <b>PU KNT 108</b>	Capacitive Push-button Black glass with Copper frame and White glass with Chrome frame. 8 buttons	Tactile and Illuminated buttons	Bus KNX	Universal Box	<b>181,89</b> <b>181,89</b>	1
	○ <b>PU KNT 118</b>						1
	● <b>PU KNT PR1</b>	Proximity sensor without contact black glass with Copper frame and White glass with Chrome frame.	Incorporates 2 configurable RGB LEDs	KNX bus	Universal Box	<b>124,12</b> <b>124,12</b>	1
	○ <b>PU KNT PR2</b>						1
	○ <b>TM KNT 001</b>	Touch Thermostat Capacitive Crystal White for FanCoil with 2 buttons	4 inputs for Door contact or Temperature probe	KNX bus	Universal Box	<b>201,58</b> <b>201,58</b>	1
	○ <b>TM KNT 002</b>						1
	○ <b>TM KNT 002</b>	Touch Thermostat Capacitive Crystal White for HVAC with 2 buttons	4 inputs for Door contact or Temperature probe	KNX bus	Universal Box	<b>201,58</b> <b>201,58</b>	1
	○ <b>TM KNT 002</b>						1

Reference	Description	Technical data	Control type	Installation	Price €	Pack. Unit.
<b>EM KNT 001</b>	Interface with 4 binary Inputs/Outputs	Line length <10m	KNX bus	Universal Box	<b>95,58</b>	1
	<b>EM KNT 002</b> Interface with 4 binary/analog Inputs/Outputs	Line length <10m	KNX bus	Universal Box	<b>104,46</b>	1
<b>EM KNT 003</b>	Interface with 8 long distance Binary inputs	Line length <200m	KNX bus	Universal Box	<b>111,82</b>	1
<b>NEW *</b> 	<b>IH KNT BW1</b> Programmer for DIN rail	Weekly Programming, Annual and Astronomical Bluetooth settings via APPConfigure and ETS-KNX	KNX bus and Bluetooth	1 module DIN rail	<b>213,07</b>	1
<b>NEW *</b> 	<b>DM KNT 03B</b> <b>DM KNT 03N</b> <b>DM KNT 03P</b> 360° Presence Detector	Coverage: Ø7m at 2.5m height IP 40 Motion, Presence or Twilight detector Adjustment of Time, Sensitivity and Luminosity via ETS	KNX bus	Flush Ceiling mounting	<b>155,25</b> <b>170,78</b> <b>170,78</b>	1 1 1
<b>NEW *</b> 	<b>DM KNT PAB</b> <b>DM KNT PAN</b> <b>DM KNT PAP</b> Motion detector for Corridors	Coverage 22m x 4m high IP 40 Motion, Presence or Twilight detector Adjustment of Time, Sensitivity and Luminosity via ETS	KNX bus	Flush Ceiling mounting	<b>171,20</b> <b>188,32</b> <b>188,32</b>	1 1 1
	<b>DM KNT 004</b> 360° Motion Detector	Coverage 7m at 2.5m height Adjust Time and Lux Compatible with: EM KNT 002, RE KNT LE3 and EM K5X 004	KNX bus	Flush Ceiling mounting	<b>64,89</b>	1
	<b>DM KNT 003</b> 200° Motion Detector	Coverage 8m at 1.2m height Adjust Time and Lux	KNX bus	Universal Box	<b>153,46</b>	1
<b>NEW</b> 	<b>DM KNT 01B</b> <b>DM KNT 01N</b> <b>DM KNT 01P</b> 360° Presence Detector	Coverage: Ø7m at 2.5m height IP 40 Motion, Presence or Twilight detector Adjustment of Time, Sensitivity and Luminosity via ETS	KNX bus	Surface Ceiling mounting	<b>165,90</b> <b>182,49</b> <b>182,49</b>	1 1 1
<b>NEW *</b> 	<b>DM KNT S1B</b> <b>DM KNT S1N</b> <b>DM KNT S1P</b> 180° Presence Detector	Frontal range between 12-16m and lateral range between 6-8m IP 55 Motion, Presence or Twilight detector Adjustment of Time, Sensitivity and Luminosity via ETS	KNX bus	Surface Ceiling mounting	<b>159,49</b> <b>175,44</b> <b>175,44</b>	1 1 1
<b>NEW *</b> 	<b>DM KNT B1B</b> <b>DM KNT B1N</b> <b>DM KNT B1P</b> 360° Presence Detector with Arm	Frontal range 12m and lateral range 6m IP 55 Motion, Presence or Twilight detector Adjustment of Time, Sensitivity and Luminosity via ETS	KNX bus	Surface Wall or Ceiling	<b>202,25</b> <b>222,48</b> <b>222,48</b>	1 1 1

\* Available February 2025

	Reference	Description	Technical data	Control type	Installation	Price €	Pack. Unit.
	 <b>IT KNT 001</b>	2-channel switch or 1-channel Blind/Shutter Actuator	Switching capacity: 2 x 16A	KNX bus	DIN rail 1 module	<b>151,70</b>	1
	 <b>IT KNT 004</b>	4-channel switch or 2-channel Blind/Shutter Actuator	Switching capacity: 4 x 16A 12 Binary/Analog inputs	KNX bus	DIN rail 4 modules	<b>199,26</b>	1
	 <b>IT KNT 008</b>	8-channel switch or 4-channel Blind/Shutter Actuator	Switching capacity: 8 x 16A 12 Binary/Analog inputs	KNX bus	DIN rail 4 modules	<b>326,48</b>	1
	 <b>IT KNT 016</b>	16-channel switch or 8-channel Blind/Shutter Actuator	Switching capacity: 16 x 16A 23 Binary/Analog inputs	KNX bus	DIN rail 8 modules	<b>518,42</b>	1
<b>NEW</b>	 <b>IR KNT 044</b>	4-channel actuator for Switching/Blinds and 4-channel regulation for RGBW LED strips and 12 inputs	Maximum load: Switching: 4 x 16A Dimming: 4 x 5A	KNX bus	DIN rail 4 modules	<b>455,00</b>	1
	 <b>PE KNT 001</b>	2-channel switch or 1-channel Blind/Shutter Actuator	Switching capacity: 2 x 16A 4 Binary/Analog inputs	KNX bus	Flush Ceiling mounting	<b>164,28</b>	1
	 <b>PE KNT 002</b>	2-channel switch or 1-channel Blind/Shutter Actuator	Switching capacity: 2 x 10A 4 Binary/Analog inputs	KNX bus	Universal Box	<b>152,01</b>	1
	 <b>RE KNT LE3</b>	1-channel RLC+LED Dimming Actuator	Maximum load: LED 250W 4 Binary/Analog inputs	KNX bus	Universal Box	<b>165,35</b>	1
	 <b>RE KNT 000</b> <b>RE KNT 004</b>	RLC+LED Dimming Actuator	Maximum load: 1-channel LED 1.000W 4-channels LEDs 4 x 250W	KNX bus	DIN rail 5 modules	<b>187,36</b> <b>384,11</b>	1 1
	 <b>RE KNT 008</b>	8-channel RLC+LED Dimming actuator	Maximum load: 250W per channel 1.200W total device	KNX bus	DIN rail 8 modules	<b>644,81</b>	1
	<b>RE KNT DA1</b>	3-channel DALI Broadcast Dimming Actuator	3 channels Max. n° of drivers: 128	KNX bus	DIN rail 5 modules	<b>293,73</b>	1
	 <b>RE KNT 110</b>	3-channel 1-10Vdc Dimming Actuator	3 channels x 50 drivers Max. n° of drivers: 150	KNX bus	DIN rail 5 modules	<b>293,03</b>	1
	<b>RE KNT RGB</b>	4-channel RGBW Dimming Actuator	Maximum load: LED strips 4 x 10A	KNX bus	DIN rail 5 modules	<b>280,28</b>	1
<b>NEW</b>	 <b>RE KNT DA2</b>	1-Channel KNX-DALI Gateway	1 addressable channel WIFI and Ethernet communication Max. n° of equipments 64	KNX bus DALI-2	DIN rail 4 modules	<b>465,00</b>	1

Reference	Description	Technical data	Control type	Installation	Price €	Pack. Unit.

## Twisted Pair System - System Devices

<b>NEW</b>		<b>FA KNT 001</b> Power supply 640mA with Auxiliary output	1 KNX output with built-in coil 1 output without coil	KNX bus	DIN rail 4 modules	<b>291,23</b>	1
		<b>CO KNT LC1</b> KNX Line Coupler Secure	Connects two KNX segments	KNX bus	DIN rail 1 module	<b>380,15</b>	1
		<b>CO KNT IPI</b> KNX IP Interface Secure	Connects two KNX segments	KNX bus	DIN rail 1 module	<b>347,97</b>	1
		<b>CO KNT IPR</b> KNX IP Router Secure	Allows forwarding between lines via LAN and programming interface	KNX bus	DIN rail 1 module	<b>515,47</b>	1
		<b>CO KNT 002</b> KNX USB Interface Stick	Set a bidirectional communication between PC and bus	KNX bus	Portable	<b>252,23</b>	1
		<b>ST KNT 001</b> Temperature Probe ø7mm for Analog inputs	NTC sensor Probe length: 4m	-----	-----	<b>15,61</b>	1
		<b>ST KNT 002</b> Temperature Probe ø5mm for Analog inputs	NTC sensor Probe length: 0.5m	-----	-----	<b>13,63</b>	1

## Radio-Frequency System - Sensors KNX-RF S-mode

		<b>EM K5X 002</b> Interface for Push-button with 2 input channels	Interface with 2 inputs Max. RF signal Range: 100m Battery-operated	KNK-RF	Junction Box	<b>89,15</b>	1
		<b>EM K5X 004</b> Binary/Analog input with 4 channels	4 binary or analog inputs Max. RF signal Range: 100m 230VAc operated	KNK-RF	Junction Box	<b>127,72</b>	1
		<b>SE K5X 002</b> Temperature and Humidity Sensor	Max. RF signal Range: 100m Battery-operated	KNK-RF	Wall projection	<b>127,21</b>	1
		<b>SE K5X 010</b> Multi-sensor for Temperature, Brightness and Humidity	Max. RF signal Range: 100m Battery-operated	KNK-RF	Wall projection	<b>149,13</b>	1
		<b>SE K5X 003</b> Door or Window Contact Sensor	Max. RF signal Range: 100m Battery-operated	KNK-RF	Wall projection	<b>153,70</b>	1
		<b>SE K5X 005</b> Temperature Sensor with Probe KNX-RF	Includes probe, special for underfloor Heating Max. RF signal Range: 100m 230VAc operated	KNK-RF	Junction Box	<b>172,65</b>	1
		<b>DM K5X 001</b> 360° KNX-RF Motion Detector	Coverage: 7m at 2.5m height Max. RF signal Range: 100m Adjust time and Lux	KNK-RF	Flush Ceiling mounting	<b>224,11</b>	1

Reference	Description	Technical data	Control type	Installation	Price €	Pack. Unit.
-----------	-------------	----------------	--------------	--------------	------------	----------------

## Radio-Frequency System - KNX-RF System Mode Actuators

	<b>MI K5X 001</b>	1 channel Switching Actuator	Switching capacity: 1 x 16A Max. RF signal range: 100m	KNX-RF and/or Wired button	Universal Box	<b>166,98</b>	1
	<b>RE K5X LE1</b>	1-channel RLC+LED Dimming Actuator	Maximum load: 1 x 250W LED Max. RF signal range: 100m	KNX-RF and/or Wired button	Universal Box	<b>152,36</b>	1
	<b>RE K5X LE2</b>	1 channel Dimming Actuator for LED strips	Maximum load: 1 x 8A 12-48V <sub>dc</sub> Max. RF signal range: 100m	KNX-RF and/or wired button	Universal Box	<b>151,50</b>	1
	<b>PE K5X 00</b>	2-channel Switching or 1-channel Blind/Shutter Actuator	Switching capacity: 2 x 16A 4 binary/analog inputs Max. RF signal range: 100m	KNX-RF and/or Wired button	Flush Ceiling mounting	<b>193,85</b>	1
	<b>RE K5X RGB</b>	3-channel RGB LED strips Actuator	Maximum load: 3 x 5A 12-48V <sub>dc</sub> Max. RF signal range: 100m	KNX-RF	Flush Ceiling mounting	<b>156,98</b>	1
	<b>PE K5X 002</b>	2-channel Switching or 1-channel Blind/Shutter Actuator	Switching capacity: 2 x 16A Max. RF signal range: 100m	KNX-RF and/or Wired Button	Universal Box	<b>193,77</b>	1
	<b>RE K5X 010</b>	1-channel 1-10V <sub>dc</sub> Dimming Actuator	Switching capacity: 1 x 5A Max. n° of drivers: 125 RF signal range: 100m	KNX-RF and/or Wired Button	Universal Box	<b>176,61</b>	1
	<b>RE K5X DA1</b>	1-channel DALI Dimming Actuator	1 output channel Max. n° of drivers: 64 RF signal range: 100m	KNX-RF and/or Wired Button	Universal Box	<b>213,05</b>	1

## Radio-Frequency System - Communication

	<b>CO K5X 001</b>	USB / KNX-RF Interface	Establishes a bidirectional communication between the PC and the Bus, via RF Max RF signal range: 100m	KNX-RF	Portable	<b>222,25</b>	1
	<b>CO K5X 002</b>	KNX / KNX-RF Media Coupler	Connects the KNX RF devices of a Radio line with the KNX twisted pair Bus Max RF signal range: 100m	KNX-RF	Junction Box	<b>376,92</b>	1

## Radio-Frequency System - Accessories

	<b>AM K5X 001</b>	KNX-RF Signal Repeater	It is possible to install up to 3 units in the same installation Max. RF signal range: 100m	KNX-RF	Junction Box	<b>83,61</b>	1
---	-------------------	------------------------	--	--------	-----------------	--------------	---

## 02 Dimmer control devices

### Load Types:

**R:** Incandescence and 230V Halogens

**L:** Inductive and leading-edge dimmable Electronic transformers

**C:** Trailing-edge dimmable Electronic transformers

**LED 1:** 230V LED lamps (dimmable by leading-edge)

**LED 2:** 230V LED lamps (dimmable by trailing-edge)

**1/10V:** 1-10V ballasts or drivers

**DALI:** DALI ballasts or drivers

Reference	Description	Technical data by type of load					Control type	Installation	Price €	Pack. Unit.

### Dimmers for LED Lamps and 230V LED Strips

	<b>RE PLE LE0</b>	2-wire Dimmer for LED lamps	----	----	----	80W	200W	Push-button	Junction Box	<b>76,19</b>	10
	<b>RE PLE LE1</b>	3-wire Dimmer for LED lamps and 230V LED strips	300W	----	300W	100W	350W	Push-button	Junction Box	<b>74,74</b>	10
	<b>RE PLE LE3</b>	3-wire Dimmer for LED lamps and 230V LED strips	----	----	300W	100W	350W	Push-button	Universal Box	<b>77,57</b>	10
	<b>RE EL1 LE3</b>	Modular Dimmer for LED lamps with Rotary knob	300W	----	300W	80W	300W	Push-button or Potentiometer incorporated	DIN rail 1 mod.	<b>99,15</b>	1
	<b>RE EL5 LE1</b>	Modular Dimmer for LED lamps, 230V LED strips and Incandescent lamps	1.200W	900W	----	1.000W	----	Push-button, Potentiometer or 0/10V <sub>bc</sub> signal	DIN rail 5 mod.	<b>305,32</b>	1
	<b>RE EL5 LE3</b>	Modular Dimmer for LED lamps and Incandescent lamps	1.000W	----	1.000W	----	1.000W	Push-button, Potentiometer or 0/10V <sub>bc</sub> signal	DIN rail 5 mod.	<b>299,68</b>	1

### Dimmers for LED strip

	<b>RE PLA LE2</b>	Dimmer for Single-color LED strips	Single color LED strips Max. load: 8A 12-48V <sub>bc</sub>					Push-button	Junction Box	<b>82,08</b>	10
	<b>RE EL1 LE2</b>	Dimmer for LED strips with Rotary knob	Single color LED strips Max. load: 8A 12-48V <sub>bc</sub>					Push-button or Potentiometer incorporated	DIN rail 1 mod.	<b>108,27</b>	1

Reference	Description	Technical data	Control type	Installation	Price €	Pack. Unit.
-----------	-------------	----------------	--------------	--------------	---------	-------------

## Dimmers for LED strip

	<b>RE EL2 LE2</b>	Dimmer for Single-color LED strips	Single color LED strips Max load: 20A 12-48Vdc	Push-button, potentiometer or 0/10Vdc signal	DIN rail 2 mod.	<b>183,82</b>	1
	<b>AM PLA LE2</b>	Amplifier for LED Strips	Max load: 8A 12-24Vdc	-----	Universal Box	<b>75,13</b>	1

## DALI-2 Dimmers and Actuators

	<b>RE PLA DA1</b>	Dimmer for DALI drivers	Up to 64 DALI devices 1 channel	Push-button	Universal Box	<b>94,29</b>	1	
	<b>RE EL5 DA1</b>	Dimmer for DALI / DALI-2 Drivers	Up to 128 DALI devices	Push-button, potentiometer or 0/10Vdc signal	DIN rail 5 mod.	<b>260,77</b>	1	
	<b>RE DA2 LE3</b>	RLC+LED Dimmer with DALI / DALI 2 input	Max load: 250W 1 channel	DALI / Cut-phase Interface	Universal Box	<b>130,85</b>	1	
<b>NEW *</b>		<b>RE DA2 RGB</b>	RGBW LED Dimmer with DALI / DALI 2 input	Switching capacity: 4 x 5A (PWM output for RGBW DT8 LED strips) DALI 2 Certificate	DALI-2	Universal Box	<b>125,65</b>	1
<b>NEW *</b>		<b>MI DA2 001</b>	2-channel Actuator with DALI / DALI 2 input	Switching capacity: 2 x 16A DALI 2 Certificate	DALI-2	Universal Box	<b>95,50</b>	1
<b>NEW *</b>		<b>MI DA2 002</b>	2-channel Actuator with DALI / DALI 2 input	Switching capacity: 2 x 16A DALI 2 Certificate	DALI-2	DIN rail 1 module	<b>109,83</b>	1

## Dimmers for 1/10V Drivers

	<b>RE PLA 010</b>	Dimmer for 1-10Vdc drivers	Up to 125 1-10Vdc devices Max. load: 1.150VA 1 channel	Push-button	Junction Box	<b>80,38</b>	1
	<b>RE EL5 002</b>	Modular Dimmer for 1-10Vdc drivers	Up to 125 1-10Vdc devices Max. load: 16A 1 channel	Push-button, potentiometer or 0/10Vdc signal	DIN rail 5 modules	<b>174,61</b>	1

\* Available February 2025

## 07 Luminaires

New Dinuy emergency luminaires, with one of the most compact designs on the market for recessed ceiling mounting. Designed for a homogeneous installation combining motion detectors with emergency luminaires.

Entre sus principales características destacan las siguientes:

- Non-permanent emergency.
- Very low power consumption with switch-mode power supply.
- Available in white, gray and black.
- High power LED.
- Green LED charge indicator. Opal diffuser.
- Version with AUTOTEST.
- Power supply: 230V<sub>ac</sub> ±10% 50Hz Class II 0.
- Lumens: 170 lm.
- Self-extinguishing enclosure material
- Autonomy of 1h.
- Ni-Cd battery 4.8V/750 mAh.
- Degree of protection IP20 / IK04.
- Manufactured according to UNE-EN 60598-2-22 standard.
- It complies with the additional requirements for premises with public concurrence.
- Product designed and manufactured in Spain.

- Data and figures are not binding. DINUY reserves the right to modify the content of this document without prior notice depending on the technical evolution of the products.

# General terms and conditions of sale and supply

## 1. Definition

- 1.1. Hereinafter, all references to the selling 'COMPANY' or 'Seller' shall refer to the company DINUY S.A.
- 1.2. Any reference to the 'CLIENT' buyer shall refer to any natural person, legal entity or institution with the capacity to contract the COMPANY's supply of 'Products' and/or services.
- 1.3. The 'PRODUCT' or materials shall refer to any equipment, or service purchased by the CLIENT from the COMPANY.

## 2. Scope of application

- 2.1. These General Terms and Conditions of Sale and Supply (hereinafter "GTCSS") shall apply to all sales, supplies, services and, in general, provisions to give and/or perform, as well as to the related offers and orders, which the Company carries out for the Client, except for everything that is expressly agreed otherwise in the relevant offer or in the acceptance of the order and which constitutes the particular conditions thereof. Therefore, any other terms and conditions that have not been expressly agreed in writing are invalid for all purposes.
- 2.2. These GTCSS shall be deemed to be fully accepted by the Client by merely placing an order or accepting an offer and shall be deemed to be communicated from the moment the Client is informed of the web page on which they are to be found or if the Client has previously received them in the course of its commercial relationship with the Company.

## 3. Ordering and scope of supply

- 3.1. El alcance del suministro estará claramente especificado en el pedido del Cliente y será vinculante para las partes. Para que se considere efectivo, el pedido tiene que recibir una aceptación expresa por parte de la Empresa, exceptuándose los casos en que, dado el carácter periódico del suministro, de mutuo acuerdo, se haya eliminado este requisito.
- 3.2. The supply includes only the Products which are the object of the order, with the exception of cases in which the Client's order, which has been accepted by the Company, explicitly includes any additional documentation or services provided by the Company or by its third parties.
- 3.3. The Company shall inform the Client of the minimum order amount to be supplied free of costs, and this amount shall vary depending on the scope of delivery on the Peninsula, Andorra or the Canary Islands. For orders with lower net amounts, the amount previously communicated as handling fee shall be charged on the invoice. Orders that are requested as urgent, at the Client's express request, shall be supplied carriage forward.
- 3.4. The supply shall be made in quantities multiple of the minimum supply indicated in the Company's current Catalogue-Tariff, being thus considered in the Client's orders.
- 3.5. The Company shall use its best efforts to ensure that the descriptions, drawings and, in general, the information contained in the catalogues, brochures and technical documentation on any support, are accurate, which, unless otherwise agreed, such elements shall have a merely indicative and approximate value, therefore they are non-binding and no guarantee is given on them, so that the Company shall not assume any liability, except in cases where the Company accepts a closed specification from the Client, which has to be part of the order documents.
- 3.6. Modifications and/or variations to the scope of an order must always be notified to the Company in writing and, in order to be valid, must be expressly accepted by the Company. Any modification shall result in a review of the price and delivery time of the order, which must be accepted again in writing by both parties.
- 3.7. The Company reserves the right to process the orders of those Clients who have breached these GTCSS in previous contracts and deliveries.

## 4. Prices and offers

- 4.1. The prices of the supply are net and in euros, excluding VAT and any other tax, duty or fee, which shall be charged subsequently in the invoice at the corresponding rates. Unless there is a stipulation to the contrary in the order, or an agreement to the contrary between the Customer and the Company derived from their commercial relationship, the prices of the supply do not include special packaging, transport, loading or unloading, deliveries or insurance.
- 4.2. In the case of pre-order offers, the prices offered are valid for thirty (30) days and during this period they will be considered fixed in the payment conditions specified in the offer, unless the supply offered is subject to change contingencies, currency or payment of tariffs and fees, in which case the offer price would be adjusted based on said variations.
- 4.3. The applicable prices shall be those indicated in the price list in force at the time of order confirmation and shall be valid to order all the Products specified in the offer. Unless specifically agreed between both parties, the prices indicated in the offer or order shall not be binding for future contracts and are understood to be for the payment terms specified in the offer delivered to the Client. If these payment terms are modified, the offer prices shall be revised by the Company.
- 4.4. Once the order has been accepted by the Company, the supply prices are considered fixed and not subject to review. However, a price adjustment shall apply if it has been agreed between the Client and the Company or if the scope of supply has been changed at the Client's request.

## 5. Payment terms

- 5.1. The Company's offer or, in the absence thereof, the Client's order accepted by the Company shall include the payment terms for the supply. Pre-specified payment terms may also be used as part of an ongoing business relationship agreement between the Company and the Client.  
In any case, the payment terms agreed between the parties must comply with the provisions of Law 15/2010, of 5 July, amending Law 3/2004, of 29 December, which establishes measures to combat late payment in commercial operations, also known as the Law on payments.
- 5.2. In the absence of any other agreement, the payment term shall be sixty (60) days after the date the Company delivers the relevant components, equipment or systems.
- 5.3. Payment shall be made on the terms agreed between the parties and shall be without any deductions such as: non-agreed deductions, discounts, expenses, taxes or fees, or any other deductions.
- 5.4. If, for reasons beyond the Company's control, the delivery, assembly, commissioning or acceptance of the supply is delayed, the payment terms agreed in the order for the supply shall be maintained.
- 5.5. If the Client is in default, they shall be required to pay the interest for late payment to the Company, calculated in accordance with the provisions of article 7 of Law 3/2004, of 29 December, from the due date of the payment, without any requirement whatsoever and without notice. The payment of this interest shall not exempt the Client from the obligation to make the remaining payments under the agreed conditions.
- 5.6. In the event that the Client is in arrears with the agreed payments, the Company may temporarily or permanently suspend, at its discretion, the delivery of the supply or the performance of the services associated with the Client, who shall not be required to make overdue payments and, where appropriate, additional compensation for the suspension of the supply or performance of the agreed services, including by interrupting all subsequent orders, if any.
- 5.7. The formulation of a claim by the Client does not entitle the Client to any suspension or deduction of payments due to the Company.
- 5.8. In order to minimise the risks of cyber fraud, if the Client receives a communication from the Company requesting a change in the bank account to which the payment is to be made, the Client shall request confirmation of the change through a different communication channel than the one through which the first request was made. If the Company does not receive this confirmation, the change request shall be denied pending direct communication with the Company's sales team.

## 6. Delivery terms and conditions

- 6.1 The delivery time is understood to be for the Product placed in the position and conditions indicated in the acceptance of the order. If not specified, delivery shall be deemed to be at the Company's factory or storage facilities. In order for the delivery time to be binding on the Company, the Client must have strictly complied with the payment schedule, if any.
- 6.2 Unless otherwise agreed, it is understood that the delivery times that may be indicated by the Company in the offer and/or in the order confirmation are merely indicative and, therefore, are not of an essential nature, and the Company shall not assume any liability whatsoever as a consequence of exceeding these delivery times.
- 6.3 The delivery time shall be modified in case:
  - a. The Client does not deliver on time the documentation necessary for the execution of the supply.
  - b. The Client requires modifications to the order, which are accepted by the Company and which in the Company's opinion require an extension of the delivery time.
  - c. The performance of work by the Client or their subcontractors is indispensable for the performance of the delivery and such work has not been performed on time.
  - d. The Client has breached any of the contractual obligations of the order, in particular with regard to payments.
  - e. For reasons not directly attributable to the Company, delays may occur in the production or provision of all or some of the elements of the supply. The reasons for delay include, but are not limited to: supplier, transport and service strikes, failures in third-party supplies, floods, storms, riots, pandemics, stoppages of the Company's personnel or its subcontractors, sabotage, accidental interruptions due to breakdowns, etc., and the causes of force majeure provided for in the legislation in force.
- 6.4 In the above cases, deferrals in the delivery time shall not modify the payment schedule of the ordered supply.
- 6.5 In the event of a delay in the delivery of the Product object of attributable to the Company, the Client shall apply the penalty previously agreed with the Company, being the only possible compensation action due to delay.

## 7. Packaging, transport and reception

- 7.1 According to Royal Decree 782/98 of 30 April, Article 18, and Law 11/1997 of 24 April, on Packaging and Packaging Waste, as the final recipient of our packaging, the Client is responsible for providing the most appropriate environmental treatment (valuation, reuse or recycling).
- 7.2 Transport, including unloading, is carried out at the Client's cost, risk and expense, and the Company is therefore exempt from any claim regarding damage, delays or impairment of the supply; the Client shall be responsible for the assumption of these risks, unless specifically agreed in the order and previously accepted by the Company.
- 7.3 On delivery of the Products, the Client shall immediately check the delivery and, in the event of any modifications or damage, shall immediately notify the carrier and explicitly and legibly document the occurrence on the delivery note.
- 7.4 For the reception of the supply, the Client shall verify the content within a period not exceeding five (5) days from its receipt, in order to check any defects and/or faults that may be attributable to the Company, communicating the existence of possible defects and/or faults immediately, if applicable.
- 7.5 Once ten (10) days have elapsed since receipt of the supply by the Client and the Company has not received written notification of any defects or faults, the supply shall be deemed to have been accepted and the warranty period shall commence from that moment onwards.
- 7.6 The supply shall be deemed to have been received by the Client if, having agreed taking-over tests, these are not carried out within the stipulated period for reasons not attributable to the Company or if the Client begins to use the Product.

## 8. Return of Materials and Claims

- 8.1 Under no circumstances shall the Company accept returns of materials without prior agreement in this regard with the Client. A period of ten (10) days is established after the supply has been received by the Client, for the Client to notify the Company of its

intention to return the goods and the reasons for doing so, and to agree with the Company, where appropriate, the procedure and conditions for the return. In any case, the Client's complaints to the Company must be made in writing and in a reliable manner.

- 8.2 In the event of a return due to an error in the order or for other reasons beyond the Company's control, a minimum of fifteen percent (15%) of the net value of the returned material shall
- 8.3 The Company shall not accept returns of Products that have been used, assembled on other equipment or installations, or subject to disassembly outside the Company, nor shall it accept returns of products designed or manufactured specifically for the order.
- 8.4 Returns of materials shall be handled every month of the year except August and December.
- 8.5 The final return value shall be subject to the approval of the inspection processes performed on the goods at the Company's facilities, which shall determine in each case the final value of the credit note, which may be up to the total of the original invoiced value, calculated on the basis of the returned Product's condition or, in the case of Products manufactured specifically for the Client's order, up to the total value of the original invoiced value. Returns shall only be assessed for Products that are published in the Company's current Price List.

## 9. Warranties

- 9.1 Unless expressly stipulated otherwise in the offer or acceptance of the order, the Company guarantees the Products it has supplied with regard to defects in materials, manufacture or assembly for a period of twenty-four (24) months from the date of receipt, whether this is explicit, after passing the acceptance tests agreed between the Company and the Client and sending a written acceptance of the supply, or tacit, for fifteen (15) days after being delivered to the Client without written communication to the Company indicating any non-conformity.
- 9.2 The warranty consists of the repair or replacement (at the Company's choice) of the elements that have been recognised as defective, either due to material, manufacturing or assembly defects. Repairs are understood to be carried out on the Company's premises.
- 9.3 The repair or replacement of a defective element of the supply does not modify the starting date of the warranty period of the whole supply, which shall be the indicated in section 9.1. However, the repaired or replaced item shall have a twelve (12) month warranty from the date of repair or replacement.
- 9.4 Damage or defects due to normal wear of the Products are excluded from the warranty. Furthermore, the warranty shall not cover and shall be deemed to have expired in the event of damage and effects caused by improper storage or maintenance, incorrect or negligent storage and handling, misuse, use of unsuitable liquids and gases as well as unsuitable flow or pressure, faulty assemblies, variations in the quality of the power supply (voltage, frequency, disturbances), modifications made to the supply without the Company's approval, installations carried out or subsequently modified without following the technical instructions for the product and, in general, any cause that is not attributable to the Company and for which the Client has not taken measures to mitigate the damage.

## 10. Return of Materials and Claims

- 10.1 The risks of loss or deterioration of the Product shall be communicated to the Client as soon as it is delivered, made available or declared ready for shipment or collection.
- 10.2 In the event that delivery or provision is delayed for reasons attributable to the Client, the transfer of risk shall take place from the time when, according to the agreement, the delivery or provision should have taken place.
- 10.3 All shipments made carriage paid by the Company are made at the risk of the Company, who shall insure deliveries only against theft or damage to the Product.

# General terms and conditions of sale and supply

## 11. Ownership

11.1 The Company reserves the ownership of the Products supplied, which shall remain its property until the Client's payment obligations have been fully met, and the Client shall be obliged to cooperate and adopt any measures that may be necessary or appropriate, as well as those proposed by the Company, to safeguard its ownership of said Products.

11.2 The Client shall not sell the materials or supplies subject to retention of title, and shall not create any security interest therein or transfer ownership thereof by way of security, unless the Company gives its express written consent.

## 12. Limitation of liability

12.1 The Company's total liability arising from the supply shall be limited to the value of the supply for which the claim has been made. The liability of the Company, its agents, employees, subcontractors and suppliers for claims arising due to the performance or non-performance of its contractual obligations shall not exceed in the aggregate the basic contractual price and shall in no event include damages arising from loss of profits, loss of revenue, production or use, capital costs, downtime costs, delays and claims by third parties of the Client, substitute energy costs, loss of anticipated savings, increased operating costs or any special, indirect or consequential damages or losses of any kind.

12.2 Some of the products supplied by the Company may be subject to export control regulations. For this reason the items supplied to the Client shall not be exported directly or indirectly by the Client or third parties without the Company's prior written consent. The Client is responsible for complying with this requirement.

## 13. Force majeure

13.1 The Company shall not be held liable in cases of force majeure, which entitle the Company to extend all agreed delivery times excluding claims for damages and losses of any kind on the part of the Client.

13.2 Cases of force majeure include, but are not limited to: supplier, transport and service strikes, failure in third-party supplies, failure of transport systems, floods, fires, riots, strikes, pandemics, stoppages of the Company's personnel or its subcontractors, sabotage, accidental interruptions due to breakdowns, adverse weather conditions, atmospheric or geological phenomena, accidents, natural catastrophes or other contingencies beyond foreseeable control, provisions of official and government authorities that during the term of the supply make it impossible to comply with the obligations assumed in the same and other causes of force majeure contemplated in current legislation that directly or indirectly affect the Company's activities.

## 14. Intellectual Property

14.1 The intellectual property of the offer and the information attached to it, and of the Products that are the object of the supply, as well as the elements, plans, drawings, photos, software, etc., incorporated or related to it, belong to the Company or to its suppliers, and therefore their use by the Client for purposes other than the completion of the order is expressly prohibited, as well as their total or partial reproduction or transfer of use in favour of third parties, without the Company's prior consent.

14.2 The Client must handle all sales documentation, specifications, quotation documentation and price lists provided by the Company in strict confidence and must not make them available to third parties without prior written consent.

## 15. Law Enforcement

15.1 Without prejudice to other provisions of these GTCSS, each party acknowledges that it shall comply with the applicable rules and regulations of international and national law, in relation to financial criminal offences, free competition, antitrust law and data protection laws, human and labour rights, environmental rights and anti-corruption, based on the following principles:

- a. Support and respect the protection of universally recognised fundamental human rights.
- b. Ensure not to be accessories to human rights abuses.
- c. Support freedom of association and the effective recognition of the right to collective bargaining.
- d. Contribute to the elimination of all forms of forced or

compulsory labour carried out under duress.

e. Support the abolition of child labour.

f. Support the abolition of discriminatory practices in employment and occupation.

g. Maintain a preventive approach in favour of the environment.

h. Encourage initiatives that promote greater environmental responsibility.

i. Encourage the development and promotion of eco-friendly technologies.

j. Companies must work against all forms of corruption, including extortion and bribery.

15.2 Failure to comply with any of the provisions contained in this Article shall be deemed to be a breach giving the Company the right to terminate any supply agreement with immediate effect, without the Client's right to claim damages in this respect, but without prejudice to any other right or remedy on the part of the Company under applicable law.

## 16. Submission to Jurisdiction and Competence

16.1 The relationship between the Company and the Client shall be governed by general common Spanish law (Code of Commerce, Civil Code and other national regulations).

16.2 The parties expressly waive any other jurisdiction that may correspond to them and submit to the jurisdiction and competence of the Courts and Tribunals of the capital city of San Sebastian in the province of Gipuzkoa (Spain).
