# Electric Vehicle Chargers

This modern and versatile DINUY charger range allows you to complete projects in residential buildings, communities, single-family homes and in tertiary sectors such as offices, hotels, hospitals, schools, shopping centers, etc., thanks to its advanced performance, communication and intelligence.

- The entire range includes KNX connectivity as standard to make your projects more efficient and intelligent. Dinuy brings together two worlds: charging and KNX, never before combined.
- Charger versions available with integrated protections and automatic reset for type 2 installations.
- Complete range for dedicated power supply with monitoring for Mode 3 charging.
- Dynamic power control and scheduling.
- Management via DINUY eMobility APP, Cloud and KNX.
- High-resistance steel enclosure with IP54 rating.
- Full connectivity via Bluetooth, WiFi, Ethernet, RFID and KNX.
- All models include 4 RFID cards and models with protections and single-phase 1 wired models include a load balancing clamp.
- OCPP protocol for interoperability between charge points and operators.
- A range designed and manufactured in Spain, the result of the alliance between Versa Design and DINUY.
- Up to 5 years warranty, unique in the market.
